

Ministry Update - July 15, 2012

Greetings to all friends and supporters of Care Medical Centre/Pro-life Ministries:

It has been a long time since updating on our blog the faithfulness of the Lord to our ministry. I am blessed and privileged to be part of the great work God is doing in Uganda Pro-life Ministries. I am excited to report to you these testimonies of God's faithfulness.

CLINIC

Thank you so much to every one of you who gives sacrificially to support our clinic. Your seed gifts have made incredible differences in many lives. Ever since the Lord allowed us to move the clinic to a new location, our clinic has become a **referral and hope-healing centre** for child and maternal health.

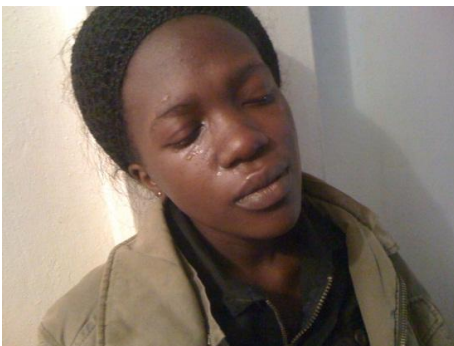

For example, in just two months we have treated more than 2,000 patients, 65% being children for diseases like malaria, HIV, pneumonia, malnutrition, measles, typhoid, and ear diseases.

Example 1: Fred

This one-year-old child is Sekaye Fred. His mother is Nakato Hawa who is HIV positive. She brought this boy very sick with severe diarrhea, vomiting, fever, crying, severe cough and difficulty in breathing and unable to feed for 7 days. We admitted Fred on July 9 after diagnosing him with severe malaria, pneumonia and malnutrition. We treated him with IV anti-malarial antibiotics and food supplements. Praise God that Fred is HIV negative, and we educated Hawa on how to protect Fred from getting HIV. Fred has responded to treatment and is due for discharge this week.

Example 2: Deborah

Deborah came to the clinic in acute pain, crying with suicidal ideas, and her only request was for someone to help inject her with medicine which could kill her! She begged me to do this several times. Deborah had lost hope totally for her life after being disappointed by the husband. I preached and counseled Deborah, and today she is in church. Praise God her life was completely restored.

Example 3:

We are privileged to be the only maternity centre and Christian-based clinic in our community. Our clinic on average delivers one baby per day. In the past two months we have delivered 59 babies. God has allowed us to further immunize these babies and children for free every Friday. The Doppler has really helped us in accurate management of all stages of labor during delivery as we can hear the fetal heart tone.

Pregnancy Centre

This month we have been able save 3 souls from the sin of abortion. Three ladies decided to choose life for their babies, and they now attend our prenatal clinic and fellowship.

Everyone feels happy when he/she is appreciated, but my heart was thrilled when Kevin came to me and said, "Emma, thank you for helping me choose life. My baby is the greatest gift God has given me next to Jesus!" She further added that God has blessed her, and she wants to dedicate her life to ministering to other ladies about how precious their babies are.

Kevin came to our clinic 10 months ago. She had conceived and was seeking for an abortion after being rejected by the husband and family. We witnessed to her about Jesus, she accepted Christ, and she chose life. We helped her through prenatal, trained her for business, delivered her at our clinic and advanced to her a loan to start a small business. Kevin now lives an independent self-sustaining life while caring for her new baby.

Business Ladies

We are grateful to God for the transformation He has brought about in the lives of many ladies through the small-scale businesses when some of these ladies didn't have any hopes of where the next meal would come from. Pro-life Ministry trains them towards self-sustainability as many ladies trade in different small businesses. These ladies can afford buying for themselves basic needs like food, rent/shelter, clothes and can provide for their babies. This is the story of one such lady.

Hawa

We advanced to her a small loan of \$100, and Hawa went and made bricks despite being a woman. She totally believes in herself that she can make it! After 3 months Hawa sold 30,000 bricks and made a profit of \$600. Her goal is to make more bricks to buy land and make bricks for her house. Friends, this is a challenge because there are many other ladies who have given birth but can't support themselves and their children. Please pray for God to provide small capital loans for these business ladies.

Fellowship

Ever since we started our fellowship, many lives have been transformed spiritually including myself. Every Saturday evening we gather all the ladies and people from the community to praise, worship, encourage, read and study the Bible. Many ladies are able to read and live by the Word of God. I am grateful for the girls living with our family, Mai and Shakira, who may be the next Don Meon or Holly Allen! I love their voices when they are leading us in praise and worship. You just feel like praising the whole day with them!

There is much the Lord has done in Uganda through our Pro-life Ministry. Please catch up with us every month on this blog as we continue to build God's Kingdom. Please stand with us in prayer in the following areas:

- 1- We believe God for oxygen therapy, a pulsometer and laboratory equipment at our clinic as we handle many pediatric cases with respiratory distress while delivering mothers.
- 2- A generator as sometimes electricity goes off, and we perform deliveries in darkness.
- 3- A sonogram machine.
- 4- Land for the clinic and building our own maternity centre.
- 5- Capital for loans for the business ladies.
- 6- Equipment for the business centre/vocational place.

Thank you so much for all your support. Together we can educate, preach, stand for life and improve lives of many people in Uganda.
